healfit®SH

**Digital
frontrunner.**

healfit®SH

Healfit® SH is an anatomical healing solution with a biomimetic design, scannable and seamlessly integrated into the digital workflow.

Designed for naturally harmonious implant restorations while preserving the osteomucosal environment, **Healfit® SH** is a valuable ally in immediate protocols.

healfit® SH

BIOMIMETIC DESIGN.

¬ **5 unique shapes*, inspired from** the study of hundreds of dental profiles, ensuring an anatomical fit across all sectors.

¬ For single-unit restorations on **Axiom®** BL and TL implants, available in multiple gingival and coronal heights.

A

*Shapes A, B, C, D and E.

Prosthetic-guided tissue preservation.

HEAL.

¬ Maintains alveolar and mucosal volume in immediate extraction-implantation protocols.

SHAPE.

¬ Helps recreate volume in healed sites with its anatomical shape and natural healing dynamics.

TAKE THE IMPRESSION.

¬ Enables direct, digital or conventional impression-taking without disconnecting the component, preserving the biological seal.

3 in 1

Continuity in prosthetic workflow

¬ Constant emergence profile, compatible with **X-Base®** Ti-bases.
DIGITAL EFFICIENCY.

Streamlined workflows

¬ **3 in 1** functionality: healing, tissue preparation, and impression-taking.

¬ Final restoration design closely aligned with the original anatomical profile, optimizing prosthetic conception and placement.

¬ Fewer components and manipulations, reducing chairside time.

DOWNLOAD LIBRARIES.

ESTHETIC AND FUNCTIONAL BENEFITS FOR PATIENTS.

¬ Discreet in-mouth appearance thanks to its natural-colored coating.

¬ Gingival contour preparation, as close as possible to the initial environment, for optimal prosthetic integration.

¬ Supports soft tissue preservation, contributing to reduce the need for invasive procedures or complex tissue grafts.

PROSTHETIC WORKFLOW EFFICIENCY.
NEW!

x.base®

A synergy for predictable prosthetics: Healfit® SH and X-Base®

¬ Recovery of the gingival emergence profile for prosthetic design closely aligned with the original environment.

¬ Matching emergence profiles between **Healfit® SH** and **X-Base®**.

¬ Facilitated prosthetic placement.
