

# Release notes v. 2021.1.1<sup>1</sup>

Below you shall find the bug fixes provided in this release.

## implant components

Fixed an issue that could potentially led to misaligned components for the following implant platforms

- Straumann RN / WN Implant System
  - Original Straumann RN components
  - Medentika L-Series components
  - Medentika N-Series components
- BEGO Implant System
  - Medentika BS-Series components

## Implant libraries

Fixed an issue that prevented access to encrypted implant libraries.

## Software update process

Fixed an issue that prevent the update process of Easy while the DWOS server was still running.

Reminder: DWOS & Easy have independent update processes so you must update each application separately once Easy is installed on your system.

---

<sup>1</sup> This version is compatible with Dental Wings standalone software licenses and the following lab scanners: 7Series, 3Series, and Medit T500, T310, T510, and T710.
