

BENEFITS OF DENTAL IMPLANTS

LIFESTYLE

How will dental implants make the patient look and feel?

- Dental implants can help to improve your overall quality of life.
- Helps you to appear younger and healthier.
- Helps you to feel more attractive.
- Resolves the problems of pain and discomfort caused by removable dentures.
- Shifting, slipping, and “chatter” of dentures are eliminated
- Allow you to speak naturally and feel like yourself.
- Eat whatever you like.
- Bite and chew naturally.
- Enjoy your favourite foods again.
- Helps to improve your eating habits.
- Your ability to taste may improve.
- You will have improved comfort, security, and confidence.
- Provide a permanent solution for missing teeth.
- Simply help you enjoy life to the full.

PRACTICAL

Function and stability of the denture and bone preservation?

- Dental implants have over 90% success rates in long-term function
- Expect to last a lifetime
- Stability is improved due to newer technology and materials for long-lasting results
- Titanium is a compatible material which naturally bonds with the jawbone.
- Minimal chance of the body rejecting this method of treatment.
- A healthy tooth root transfers biting forces to the bone and maintains its strength and position.
- Dental implants are extremely strong, helping to eliminate slippage.
- Help keep other teeth in position.
- Helps to prevent bone loss.
- Research shows that in many cases dental implants are stronger than natural teeth.

TOP TIP

Keep these sheets wherever they will be most useful - in the surgery, at reception, etc.

BENEFITS OF DENTAL IMPLANTS

CLINICAL

What are dental implants and what are they used for?

- Dental implants can be used to replace a single tooth or many missing teeth.
- They support crowns, bridges or dentures.
- Dental implants are surgically placed into the jawbone
- A dental implant is a small screw made of titanium which bonds with the jaw serving as a replacement for teeth.
- Titanium is compatible with living tissues, allowing your body to naturally accept the implant.
- Provides a stable foundation for replacement teeth.
- Preserves the neighbouring teeth and bone structure.
- Helps keep the bone healthy.
- Implant-borne dentures can be easily removed for cleaning and replaced with a simple, firm fit.
- More beneficial than conventional removable dentures, which have little or no stimulation of the bone causing deterioration over time.

FINANCE

What are the costs involved and how can patients spread the costs?

- Dental implants are more affordable than ever before.
- Cost of dental implants is dependent on the individual case.
- We can discuss the question of cost and help you make financial arrangements.
- There are a number of financing options.
- You can choose the method of payment that is best for you.
- The restoration is sometimes covered at least partially by insurance, depending on your policy.
- Our practice offers financing through a third-party company, a payment plan option, or a discount for full payment prior to treatment.
- Cost covers:
 - Highly skilled professionals
 - Highly customised treatment plan
 - Valuable materials and technology
- Some patients require bone grafting, sleep sedation anaesthesia or healing procedures that can add to the cost of the treatment plan.
- Dental implants are an investment that can help to improve your quality of life.
