

*GLOBAL EDUCATION
CATALOG 2019*

 **NEODENT**[®]
A Straumann Group Brand

How to use this catalog

What's new? →

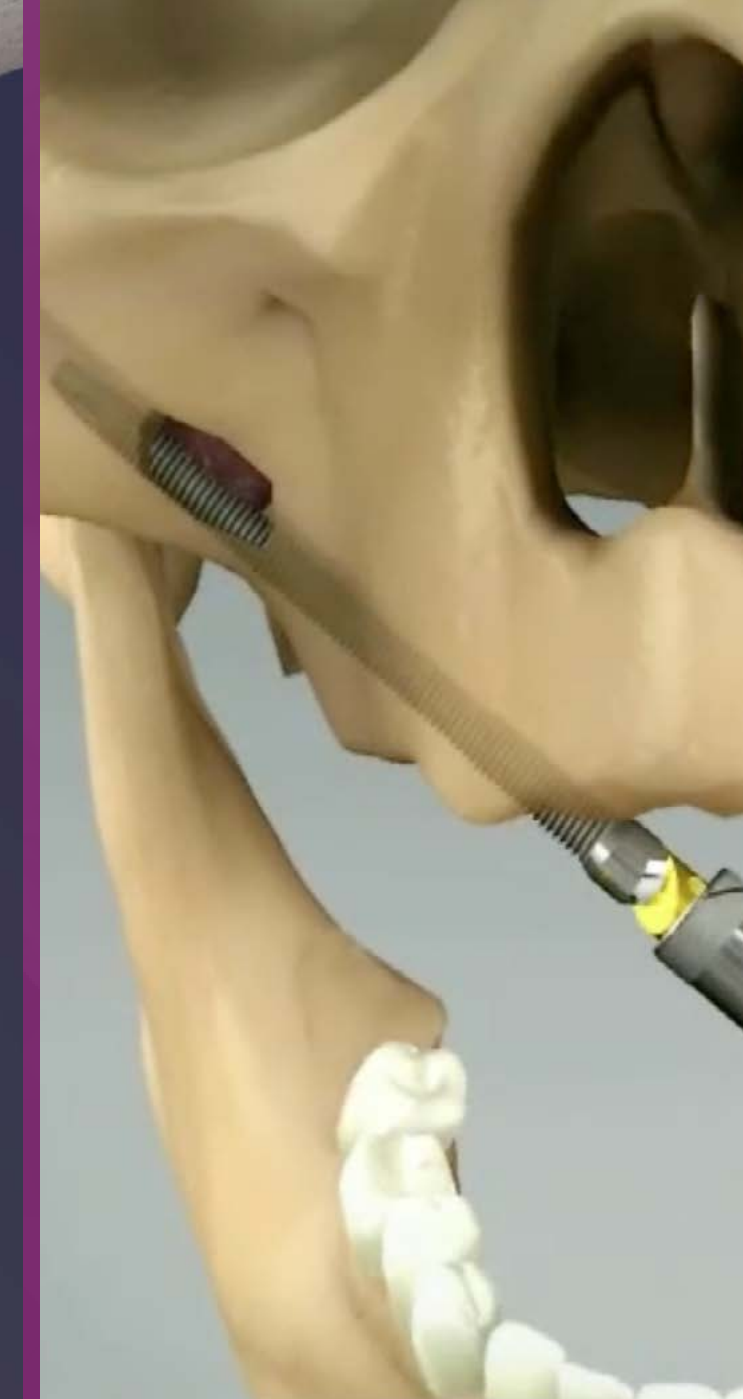

This catalog shows by continents distribution the Neodent® partner courses around the World.

Terms & Conditions

- Course costs do not include travel, accommodation and other non-tuition related costs;
- VAT and / or applicable taxes are also not included in all instances.
- All global courses and individual arrangements are conducted by external educators
- Independent from Neodent®. Course dates can change.

Course Level

Straightforward +

New to Implantology, these courses will allow you to perform surgical and prosthetic procedures in cases that are less complex and have predictable esthetic and functional outcomes.

Advanced ++

These courses allow you to develop your existing experience in Implant Dentistry.

Complex +++

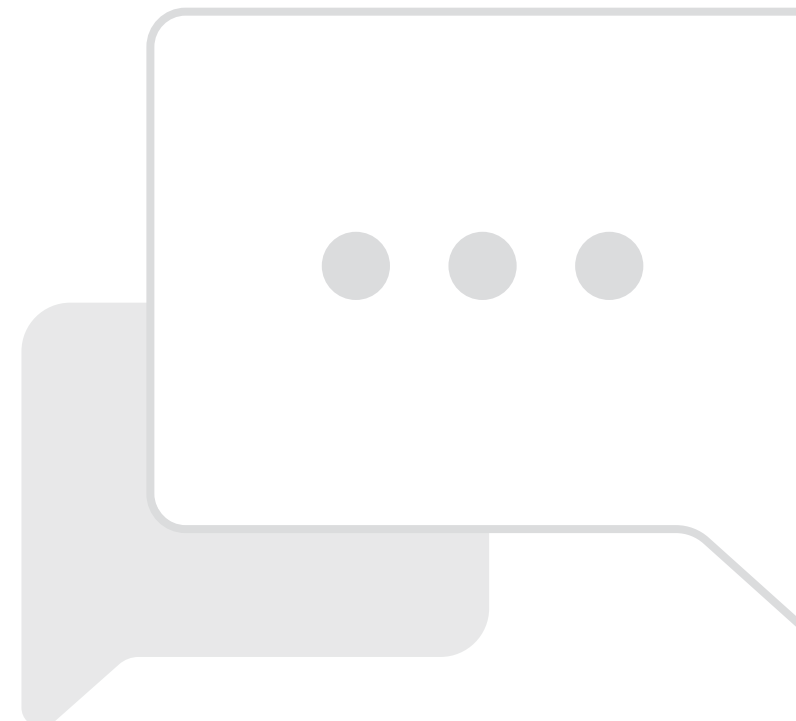

These courses will enable you to treat challenging situations using advanced treatment planning, complex surgical and prosthetic procedures. It requires significant experience in placing implants.

This PDF features interactive elements like buttons, movies, hyperlinks and bookmarks. Enjoy :)

Speakers

Dr. Rubens Moreno de Freitas

Graduated in Dentistry at the Universidade Estadual Paulista Julio de Mesquita Filho, Research Fellowship in LAPCR - Augusta University, USA and PhD in dentistry with emphasis on Implantology at UNESP. He is currently professor of the Master's degree in Implantology and International Courses Coordinator at ILAPEO (Latin American Institute for Dental Research Education), Curitiba/PR, Brazil.

Dr. Andrew Melenikiotis

Professor of the International Courses in Implantology at ILAPEO, Curitiba since 2015. Senior School at the British School in Sao Paulo (St. Paul's School) Graduated from Dental School at the University of Sao Paulo, Brazil. Specialization (post graduate course) in Implantology at FAPES, Brazil. Masters program in Implantology at ILAPEO, Curitiba/PR Brazil.

Dr. Joe Bhat

BDS FDS RCS MClintDent MRD RCSEd, Specialist in Prosthodontics and Oral Surgery Joe is currently an Hon. Visiting Professor at MM University, India. His clinical time is spent as a private referral practitioner at the Moor Park Specialist Dental Center. Is a Clinical Lecturer for the Master of Clinical Dentistry program at the Eastman Dental Institute. He is also a Fellow of the International Team for Implantology (ITI), Fellow of the International College of Dentists (ICD) and Examiner for the Royal College of Surgeons, Edinburgh for the Diploma in Implant Dentistry.

Dr. Kailesh Solanki

Dr Kailesh Solanki graduated from Manchester with 2 clinical prizes. He has recently opened up his 4th Dental practice in the Manchester area. With post graduate qualifications in advanced restorative dentistry, implantology and aesthetic dentistry and placing around 700 implants per year, much of Dr Solanki's time is spent at his clinics offering advanced procedures such as full arch fixed same day smiles, sinus lifting and bone augmentation.

Speakers

Dr. Luiz Eduardo Padovan

MMS, PhD of Surgery and Maxillofacial by UNESP, Brazil
Lecturer Fellow of the American Academy of Implant Dentistry
–AAID; Professor of Postgraduate Course Doctor – Master in
Implantology of the Latin American Institute of Research and
Dental Education ILAPEO, Curitiba/PR.

Dr. Greig McLean

MFDS RCPS (Glasg), BDS (Glasg).
MB ChB (Glasg) Clinical Director,
Doctor & Dentist (GDC No 79630)

Greig works with implantology, cosmetic and surgical dentistry.
He also practices the treatment of anxious and phobic dental
patients. Dr McLean has been placing implants since 2005
and teaches all aspects of surgery and restoration and is
now placing Zygomatic Implants. Dr McLean is a member of
the International Team for Implantology (ITI), the Association
for Dental Implantology UK (ADI), and the British Academy of
Cosmetic Dentistry (BACD).

Dr. Miguel Braga Pinto

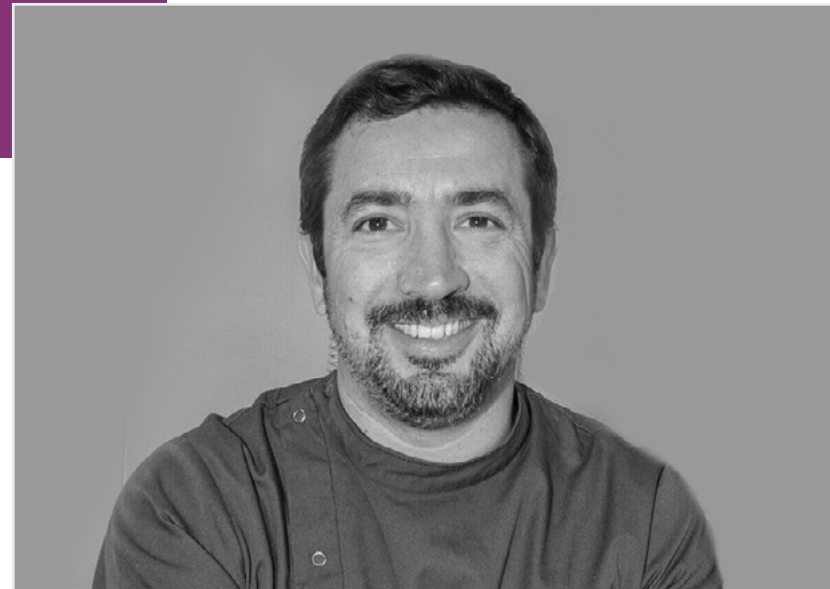

Master in Implantology and Oral Rehabilitation
Specialist in Periodontology.

Dr. Reinaldo Siqueira

Post-Graduated in Prosthetics
Master in Implantology and Specialist in Periodontology.

Speakers

Dr. António Carvalho

Specialist in Periodontology (ISCS), Implantology Course, Neoguide Credential (ILAPEO), Periodontology/Implantology Course, responsible for the Oral Rehabilitation Service in Implantology in several private clinics.

Dr. Pedro Rodrigues

DMD at ISCSN. PhD in implantology. 2008, Implantology Practice in. 2010, MSc in Oral rehabilitation. 2011, Malo Clinic in Porto. Pedro spent four years working in Dr. Paulo Malo (inventor of All-On-Four technique) clinic in Porto. Since 2010, Pedro is giving international courses, with live surgeries and training in implantology Pedro has treated more than +1000 cases with the all on four concept and he developed a special concept that provides immediate loading in only three hours with high esthetics.

Dr. Jorge André Cardoso

After graduating in dentistry from Faculdade de Medicina Dentária da Univ. do Porto he pursued his Master in prosthodontics. He is the Clinical Director of ORA Clinic, in Portugal. He is an Honorary Clinical Teacher at Kings' College London, and researcher author of several scientific articles in peer-reviewed journals. The founder of the software MakeMeClear™ to help dentist better communicate with patients. He is a lecturer in Esthetics, restorative and interdisciplinary dentistry in several private courses and events.

Dra. Isabel Ferreira

DMD at IUCS
PhD in Implantology at IMS
Specialized in Periodontology at IUCS
Advanced Studies Diploma (DEA) at University of Barcelona
PhD in Advanced Oral Surgery at IMS
Lateralization of the Inferior Alveolar Nerve, Course on
Advanced Implantology and Oral Rehabilitation

Speakers

Dr. Gabriela Sifuentes Carrillo

DDS, Universidad Autónoma Nacional de México, UNAM,
México

Specialist in Periothontics and Implantology, Universidad
Autónoma Nacional de México, UNAM, México

Private practice in periodontics and oral implantology in Mexico
City, Mexico.

Dr. Christian Navarro

DDS, Universidad Autónoma de San Luis Potosí, UASLP,
México

Oral Implantology and Prothesis, Universidad Autónoma de
Querétaro, UAQ, México

Immediate loading, ILAPEO Curitiba, Brasil

Advanced Surgery and Oral Implantology, ILAPEO Curitiba,
Brasil

Private practice in oral implantology in San Luis Potosí and
Guanajuato, Mexico

Dr. Martin Salinas Mendez

DDS, Universidad Autónoma de San Luis Potosí, UASLP,
México

Immediate loading, (ILAPEO), Curitiba, Brasil

Private practice in oral implantology in San Luis Potosí and
Guanajuato, Mexico

Dr. Felipe Guerrero Gonzalez

DDS, Universidad Autónoma de San Luis Potosí, UASLP,
México

Master in oral rehabilitation, Universidad Autónoma de
Aguascalientes UAA , México

Oral Implantology, Loma Linda University, CA

Teacher in the master of integral advance odontology, UASLP,
México

Speakers

Dr. Nicolai Böhme

Dental studies at Philipps-Universität in Marburg

DGP- Curriculum periodontics and certification

Certification for implantology (DGI-Curriculum)

Established practice in Emstek

MARCH
12 - 15

Portuguese
Brazil

Immersion in prosthetic clinical workflow

Factory Tour

Live Surgery

Surgery in Patient

Hands-on Plastic Model

Straightforward

Participants: 12 doctors per course

Practice: 2 cases per participant

Duration: 4 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To fully understand the restorative options and indications of the GM connection, attending at least 2 patients per participant

Course topics

- Prosthetic treatment planning aiming at implant supported rehabilitation
- Abutment selection: understanding the options and the indications
- Implant/Abutment interface impression techniques
- Clinical workflow to acquire the desired definitive crown
- Working together with the lab technician: cast and CAD/CAM metal/zirconia infrastructures
- One step passive fitting technique for full arches
- Occlusal aspects regarding implant supported rehabilitations
- Importance of the maintenance for longevity and success
- **Hands-on:** overview on the prosthetic abutments options in GM system
- **Clinics:** patient attendance, step by step from impression to definitive ceramic crown installation

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent prosthetic options treatment planning aiming at implant supported rehabilitation.

About ILAPEO Dental School

Educate yourself in ILAPEO at the Latin American Institute of Dental Research and Education. A rare opportunity to train with the elite masters and trainers of ILAPEO. Neodent has partnered with ILAPEO (The Latin American Institute of Dental Research and Education), a renowned center of excellence in research, development and innovation in dental clinical practice. ILAPEO is an institution made up of professionals, teachers and researchers whose aim for the last 10 years has been to offer recognized and certified postgraduate, specialist and master's courses.

Factory Tour

Visit Neodent Manufacturing Plant to get the Neodent 360° overview of its operation and where over one million implants are produced every year making Neodent the 2nd largest company in the segment. Recently, Neodent intensified its expansion project, building a new logistics center of 2,400m² and increasing the factory's size from 10,00m² to 15,000m².

Explore the City

Curitiba is capital of the state of Paraná, located in the southern region of Brazil. The city is considered the greenest urban area of Latin America, with amazing parks such as the Botanical Garden, Tanguá and Barigui park. Curitiba is also a national reference in quality of life, urban innovations, culture and gastronomy. The culture life is surrounded by museums and art exhibition galleries. Besides, the nightlife is full of options, going through craft breweries into fine restaurants.

Neodent Guided Surgery

Factory Tour

Live Surgery

Surgery in Patient

Hands-on Plastic Model

Straightforward

Participants: 6-8 doctors per course

Practice: 2 cases per participant

Duration: 4 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To show the latest methodology of planning dental implant placement and surgery using accurate surgical guides.*

Course topics

- Guided Surgery- where we came from and where we are now
- Advantages, indications and precision.
- Pre-prosthetic preparation for radiographic guide
- Workflow for single, multiple and full arch cases
- Uploading patient CT and scans to the software
- Managing the Co-DiagnostiX software
- Understanding the surgical guide
- Outsourcing of virtual planning and guide fabrication
- Surgical Technique and Specific Surgical Kit
- **Hands-on:** Guided surgery on mannequin
- **Clinics:** One Full arch with Guided Surgery per pair of participants plus single or multiple cases per participant

Learning objectives

This is a theoretical/practical course for professionals interested in knowing principles of Neodent Guided Surgery.

*This course can be customized according to the level and quantity of participants.

Rehabilitation with zygomatic implants

Factory Tour

Live Surgery

Frozen cadaver

Hands-on Plastic Model

Complex

Participants: 4 doctors per course

Practice: 1 case per participant

Duration: 3,5 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To train the professionals who already work in implant dentistry area with complex surgeries to perform atrophic maxillary surgeries using zygomatic implants.

Course topics

- Definition and Principles in immediate loading
- History of the use of zygomatic anchors;
- Surgical technique for the installation of zygomatic fixation;
- Using 4 zygomatic fixation and future complications in anchoring techniques;
- Workshop;
- Procedures in hospital, therapeutic and preoperative;
- Approaches to treatment of atrophic maxilla;
- Alternatives for sinus lift procedures and inclined implants in the medial wall
- of the maxillary sinus;
- Anchorage into the tuber area and pterygoid implants;
- Prosthetic aspects involved in the rehabilitation of atrophic maxilla.
- **Hands-on:** Surgical technique for installation of Zygomatic fixations.
- **Clinics:** planning and operating patients in atrophic maxilla using zygomatic implants technique

Learning objectives

High complexity course that aims to train the professionals who already work in the Implant Dentistry area with complex surgeries to perform atrophic maxillary surgeries using the zygomatic implants.

Straightforward

Participants: 12 doctors per course

Practice: 2 cases per participant

Duration: 4 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To fully understand the restorative options and indications of the GM connection, attending at least 2 patients per participant

Course topics

- Prosthetic treatment planning aiming at implant supported rehabilitation
- Abutment selection: understanding the options and the indications
- Implant/Abutment interface impression techniques
- Clinical workflow to acquire the desired definitive crown
- Working together with the lab technician: cast and CAD/CAM metal/zirconia infrastructures
- One step passive fitting technique for full arches
- Occlusal aspects regarding implant supported rehabilitations
- Importance of the maintenance for longevity and success
- **Hands-on:** overview on the prosthetic abutments options in GM system
- **Clinics:** patient attendance, step by step from impression to definitive ceramic crown installation

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent prosthetic options treatment planning aiming at implant supported rehabilitation.

Practice: 1 case per participant

Duration: 3,5 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To train the professionals who already work in implant dentistry area with complex surgeries to perform atrophic maxillary surgeries using zygomatic implants.

Course topics

- Definition and Principles in immediate loading
- History of the use of zygomatic anchors;
- Surgical technique for the installation of zygomatic fixation;
- Using 4 zygomatic fixation and future complications in anchoring techniques;
- Workshop;
- Procedures in hospital, therapeutic and preoperative;
- Approaches to treatment of atrophic maxilla;
- Alternatives for sinus lift procedures and inclined implants in the medial wall
- of the maxillary sinus;
- Anchorage into the tuber area and pterygoid implants;
- Prosthetic aspects involved in the rehabilitation of atrophic maxilla.
- **Hands-on:** Surgical technique for installation of Zygomatic fixations.
- **Clinics:** planning and operating patients in atrophic maxilla using zygomatic implants technique

Learning objectives

High complexity course that aims to train the professionals who already work in the Implant Dentistry area with complex surgeries to perform atrophic maxillary surgeries using the zygomatic implants.

Soft tissue grafts associated with implants

Main Objective

To improve the outcome of immediate loading in the aesthetic zone.

Course topics

- Definition and principles in immediate loading
- Pre-requisites for primary stability
- Surgical technique - single and multiple cases associated with soft tissue grafting
- Prosthetic components and restorative possibilities for single and multiple/ cement and screw-retained
- The importance of keratinized mucosa for implant longevity
- Soft tissue harvesting techniques
- Alveolar ridge preservation
- Periodontal and aesthetic planning in the anterior region
- Soft tissue graft techniques for periimplant and periodontal sites
- Achieving the ideal emergence profile of the temporary crown
- Strategies to treat fresh sockets with or without buccal wall defect
- Challenging treatments in the aesthetic zone
- **Live surgery Demonstration:** immediate loading in the aesthetic zone with soft tissue manipulation
- **Hands-on:** practicing soft tissue techniques on pig jaws
- **Clinics:** planning and operating patients with single and multiple implants associated with soft tissue grafting.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on the concept of soft tissue management main concepts associated to implantology and periodontics.

Practice: 2 cases per participant

Duration: 4 days

Venue: University ILAPEO
Rua Jacarezinho, 656,
Mercês Curitiba,
Paraná, Brazil
CEP 80.710-150

Main Objective

To prepare the professional in immediate loading for his day to day practice.

Course topics

- Definition and Principles in immediate loading
- Pre-requisites for primary stability
- Surgical Technique - single and multiple / full-arch
- Implant design & bio-engineering
- Prosthetic components and restorative possibilities for single and multiple/ cement and screw-retained
- Prosthetic prep for full arches-from impression to multi-functional guide
- Surgical planning for maxilla and mandible
- Metal bar- casted and CAD/CAM
- Installation of the hybrid- recommendations and follow-ups
- Guided Surgery- where we came from and where we are now
- Advantages and indications
- Workflow for single, multiple and full arch cases
- Outsourcing of virtual planning and guide fabrication
- Surgical Technique and Specific Surgical Kit
- **Full-arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** understanding the GM connection, the Helix hybrid implant, and all prosthetic components for analog and digital workflows.
- **Clinics:** planning and operating patients to deliver immediate single and multiple temporary restorations.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on the concept of immediate loading and oral implants.

About ILAPEO Dental School

Educate yourself in ILAPEO at the Latin American Institute of Dental Research and Education. A rare opportunity to train with the elite masters and trainers of ILAPEO. Neodent has partnered with ILAPEO (The Latin American Institute of Dental Research and Education), a renowned center of excellence in research, development and innovation in dental clinical practice. ILAPEO is an institution made up of professionals, teachers and researchers whose aim for the last 10 years has been to offer recognized and certified postgraduate, specialist and master's courses.

Factory Tour

Visit Neodent Manufacturing Plant to get the Neodent 360° overview of its operation and where over one million implants are produced every year making Neodent the 2nd largest company in the segment. Recently, Neodent intensified its expansion project, building a new logistics center of 2,400m² and increasing the factory's size from 10,00m² to 15,000m².

Explore the City

Curitiba is capital of the state of Paraná, located in the southern region of Brazil. The city is considered the greenest urban area of Latin America, with amazing parks such as the Botanical Garden, Tanguá and Barigui park. Curitiba is also a national reference in quality of life, urban innovations, culture and gastronomy. The culture life is surrounded by museums and art exhibition galleries. Besides, the nightlife is full of options, going through craft breweries into fine restaurants.

Full arches with immediate loading: an immersion on NeoArch® technique

Main Objective

To prepare the experienced surgeon on state of the art treatment for full arches.

Course topics

- Definition and principles in immediate loading
- Pre-requisites for primary stability
- The importance of pre-prosthetic prep for the success of hybrid rehabilitations
- Multi-functional guides
- Surgical planning for maxilla and mandible
- Surgical and impression techniques
- Working together with the lab technician: cast and CAD/CAM metal bars
- One step passive fitting technique
- Installation of the hybrid: recommendations and follow-ups
- **Full arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** surgical and prosthetic steps conducted on mannequin
- **Clinics:** one full-arch treatment per participant as main surgeon and another one as second surgeon.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on state of the art treatment for full arches.

Advanced surgeries bone grafts with emphasis on sinus lifts

Main Objective

To present the latest techniques in bone augmentation in implantology with predictability and scientific evidence: from theory to practice.

Course topics

- Patient pre-operative evaluation
- Treatments for the atrophic jaws
- Options for grafting- autogenous and biomaterials
- Techniques for inlay and onlay bone grafting
- GBR - lateral and vertical augmentation
- Advantages and disadvantages of the use of conventional and piezo instruments
- Wide and short implants: as an alternative to bone grafts
- **Live surgery demonstration:** lateral ridge augmentation or sinus lift
- **Hands-on:** bone inlay and onlay grafts and implant placement
- **Clinics:** depending on patient availability and approval, cases with lateral ridge augmentation may be done, being that the focus is on sinus lifts with or without immediate implant placements

Learning objectives

This is an advanced course with patient care for professionals who already have experience in surgeries, especially in implantology. Indicates for doctors that want to acquire or share knowledge and professional experiences especially in full arch rehabilitation with oral implants using the concept of immediate loading, as well as procedures of bone grafts: elevation of the maxillary sinus floor and block bone grafts (onlay).

Graduate International Dental Implantology NEO 1.0

Main Objective

The course is directed to dental specialists interested in deepen their knowledge in: implantology, prosthetics, tissue management and digital solutions with Neodent and Straumann Group products.

Course topics

- Immediate loading
- Digital workflow
- Prosthetic planning
- Soft and Hard tissue management

Learning objectives

Learn how to make a correct diagnostic and to surgically and prosthetic plan to treat patients with loss of one tooth, or that are partially toothless.

Learn to maintain soft and hard tissue healthy and guarantee success long term in implantology cases.

Train the dental professional to know and acknowledge their limitations to treat their patients in a multidisciplinary way.

Prepare the student to prevent and solve the different complications that could happen when performing oral surgery for implant placement or tissue management, and also with the prosthetic placement and planning with the dental lab.

Advanced surgeries bone grafts with emphasis on sinus lifts

Main Objective

To present the latest techniques in bone augmentation in implantology with predictability and scientific evidence: from theory to practice.

Course topics

- Patient pre-operative evaluation
- Treatments for the atrophic jaws
- Options for grafting- autogenous and biomaterials
- Techniques for inlay and onlay bone grafting
- GBR - lateral and vertical augmentation
- Advantages and disadvantages of the use of conventional and piezo instruments
- Wide and short implants: as an alternative to bone grafts
- **Live surgery demonstration:** lateral ridge augmentation or sinus lift
- **Hands-on:** bone inlay and onlay grafts and implant placement
- **Clinics:** depending on patient availability and approval, cases with lateral ridge augmentation may be done, being that the focus is on sinus lifts with or without immediate implant placements

Learning objectives

This is an advanced course with patient care for professionals who already have experience in surgeries, especially in implantology. Indicates for doctors that want to acquire or share knowledge and professional experiences especially in full arch rehabilitation with oral implants using the concept of immediate loading, as well as procedures of bone grafts: elevation of the maxillary sinus floor and block bone grafts (onlay).

Immediate Loading technique with GM implants: from surgery to prosthetic resolution

Main Objective

To prepare the professional in immediate loading for his day to day practice.

Course topics

- Definition and Principles in immediate loading
- Pre-requisites for primary stability
- Surgical Technique - single and multiple / full-arch
- Implant design & bio-engineering
- Prosthetic components and restorative possibilities for single and multiple/ cement and screw-retained
- Prosthetic prep for full arches-from impression to multi-functional guide
- Surgical planning for maxilla and mandible
- Metal bar- casted and CAD/CAM
- Installation of the hybrid- recommendations and follow-ups
- Guided Surgery- where we came from and where we are now
- Advantages and indications
- Workflow for single, multiple and full arch cases
- Outsourcing of virtual planning and guide fabrication
- Surgical Technique and Specific Surgical Kit
- **Full-arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** understanding the GM connection, the Helix hybrid implant, and all prosthetic components for analog and digital workflows.
- **Clinics:** planning and operating patients to deliver immediate single and multiple temporary restorations.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on the concept of immediate loading and oral implants.

NeoArch® – Restoring full arch implant bridges on 4 implants

Live Surgery

Hands-on 3D Model

Participants: 12 doctors per course

Fee: £1,395

Duration: 2 days

booking info: +44 (0) 141 442 0052

E-mail: cc@berkeleyclinic.com

Venue: The Berkeley Clinic,
5 Newton Terrace,
Glasgow G3 7PJ

Main Objective

This course will help you to gain the skills you need to provide your patients with full arch treatment options. It provides essential knowledge for full arch rehabilitation on four implants with immediate loading. Preoperative planning, surgical and prosthetic concepts are explained through lectures, a live surgery demonstration and hands-on sessions on models.

Course topics

- Morse taper principles
- Surgical and prosthetic components
- Immediate loading and considerations
- Immediate provisionalisation
- Complications for full arch cases
- View live surgery
- Final stage restoration and hygiene considerations

Explore the City

Big, bold, and beautiful, Scotland's largest city is bursting with things to do. Walk Glasgow's streets for an eyeful of stunning architecture, take a culture tour of museums, or sample the vibrant nightlife. You'll be guaranteed the famous, friendly welcome. The best way to explore Glasgow is on foot. You'd be hard-pressed to get lost in the grid-like system of its streets, so our advice is to grab a map and set out sightseeing. Traffic and parking can be difficult in the city centre, so if you'd prefer to travel at a faster pace, then the bus and subway network is cheap, easy, and reaches all the main sights. You can even grab a bus tour to get your bearings at the start of your trip.

Modular Course in Implant Dentistry Level 1 and Level 2 Training

Live Surgery

Hands-on pig jaw

Hands-on 3D Model

Participants: 10 doctors per course
Practice: 3 (within the Brazil module)
Fee: £5,995 (excluding Brazil Module)
Brazil Module: price on application
Duration: 10 days
Booking info: Sarah Jones
Referral Liaison/Course Coordinator
Tel: 01923 823504
Mobile: 07900 606313
E-mail: sarahjones@moorparkdental.com
Venue: Joe Bhat Academy
10 Main Avenue Moor Park
Northwood
Middlesex
HA6 2HJ

Main Objective

This modular course in implant dentistry is for both clinicians with limited implant experience seeking to incorporate implant treatment into their practice with confidence and those wishing to advance their placement and surgical skills.

Joe Bhat and the education team delivering the course have accumulated over 20 years of clinical and teaching experience as well as gaining a reputation for excellence and giving delegates the confidence to place and restore implants using the Neodent® Implant System.

Course topics

- Single or multiple implants;;
- Implants into extractions sockets;
- Immediate load protocols for single tooth;
- “One abutment one time” which is unique to this system;
- For more experienced implant practitioners who wish to take their training to the next level the course offers the additional;
- opportunity to understand and experience the following types of cases;
- Single arch immediate load;
- Sinus augmentation with or without simultaneous implant placement.

Learning objectives

This course is designed to provide clinicians with the theoretical and practical skills required to place and restore dental implants to the highest standard, with the aim of delegates gaining the clinical competence needed for the provision of safe and satisfactory dental implant treatment to their patients.

The UK element of this course provides theoretical and hands-on practical sessions on models and live surgery on single tooth and full arch cases all with immediate loading. The course also includes an exceptional trip to ILAPEO, Curitiba in Brazil which offers hands-on training on live patients (see course fee guide).

Explore the City

Northwood is a picturesque suburb of Greater London on the north-west border with Hertfordshire. Much of Northwood has been declared a conservation area to protect beautiful period buildings and scenic townscapes including the lovely, leafy Dene Road and the private Copsewood Estate, home to some gorgeous multi-million-pound mansions. Northwood is separated from its close neighbour South Oxhey by Oxhey Woods, a 240-acre nature reserve that bursts into life in springtime with carpets of wood anemones and bluebells. A small settlement, Northwood boasts no less than three golf courses - Northwood, Sandy Lodge and Haste Hill. Nearby, in the appealing town of Rickmansworth, is the famous Moor Park course whose club, in a grand house, welcomes the public. At the same time, visitors to Northwood are only three miles away from the contemporary attractions of Watford, with its excellent shopping, nightlife and culture.

Simplifying Immediate loading using the Neodent® Grand Morse® system

Live Surgery

Patient treatment

Hands-on 3D Model

Participants: 9 doctors per course

Practice: 1 case per participant

Duration: 2 days

Booking info: +44 161 832 9477

E-mail: h@kissdental.co.uk

Venue: Kissdental
Stanley Street
Manchester UK
Phone: +44 161 832 9477
email: h@kissdental.co.uk

Main Objective

This 2-day course is designed for clinicians currently placing implants and who are now wanting to learn about immediate loading and how they can introduce this technique into their practices.

This practical course will allow the dentists to place single implants with an immediate load, demonstrating the importance of soft tissue control in the aesthetic zone. The high-light of the course will be a live demonstration of the full arch same day smile technique, with step-by-step immediate acrylic bridge transition.

The course will cater for dentists, with the option to bring their own dental technician and dental nurse, and is conducted in the relaxed atmosphere of one of Dr Solanki's award-winning practices in Manchester. The course will demonstrate the restorative phase from start to finish using Neodent® Grand Morse® Componentry.

Course topics

- Treatment planning;
- Introduction to Neodent® Grand Morse® implant system;
- Option to place a single implant on your own patient, with on-site mentoring (immediate or delayed load optional, case dependent);
- A live demonstration of a full arch "immediate load" technique Special features;
- Bring your own dental nurse and technician;
- Optional dental nurse training available from Dr Solanki's principal nurse.

Learning objectives

- Have a full understanding of the Neodent® Grand Morse® implant system, including implant and abutment selection;
- Be able to identify suitable patients for immediate loading;
- Treatment planning for surgical cases;
- Recognise and overcome unforeseen challenges that you may be faced with;
- Work effectively as a clinical team with dental technicians and nurse.

Explore the City

Youthful, diverse, energetic and bursting with character; Manchester is one of the most exciting places to visit in the UK right now where everybody and anybody is very warmly welcomed.

Known throughout the world as the birthplace of the industrial revolution, Manchester has a proud history in science, politics, music, arts and sport. And today the city combines this heritage with a progressive vision to be a city that delivers surprise and delight in equal measures.

Manchester city centre is jam-packed with unique and eclectic restaurants, bars, shops, museums, galleries, hotels and places to stay whilst the surrounding Greater Manchester boroughs offer a patch-work of visitor experiences including quaint market towns, traditional pubs and beautiful green spaces and waterways to be explored on foot or bike. The city region is easily navigated, with great transport links both in and around Greater Manchester.

Furthermore, a packed calendar of world-class events and festivals – from the landmark Manchester International Festival to the enchanting Manchester Christmas Markets – mean there's always another reason to visit Manchester.

Total rehabilitation with immediate loading

Live Surgery

Surgery in Patient

Hands-on bone block, plastic jaws

Advanced

Complex

Participants: 8 doctors per course

Practice: 1 complete surgery + assistance to colleagues' surgeries

Duration: 4 days

Venue: R. Padre Vitorino de Sousa Alves 34, 4715-213 Braga, Portugal

Main Objective

This course is for dental professionals who already place dental implants but seek to learn, improve and actually perform patient surgeries with immediate full arch rehabilitation with the Neodent Implant System.

Course topics

- **Hands-on course:** With actual patients where participants perform implant surgery with immediate loading. Full arch rehabilitation with only four implants two axial implants tilted up to 45° in the posterior and a fixed bridge for patients meeting the immediate loading criteria.
- Review the scientific basis: Complete implant supported rehabilitation and the NeoArch® concept. Allow participants to apply the surgical and restorative skills in a hands-on workshop on actual patients.
- Focus on the clinical and laboratory aspects: Biological, functional and aesthetics parameters in immediate loading of full arch implant supported rehabilitations.

Learning objectives

- Review the scientific basis for total implant rehabilitation and the NeoArch concept;
- Allow participants to apply surgical and restorative techniques through hands-on in real patients;
- To demonstrate the clinical and laboratory aspects at the biological, functional and aesthetic level of the total rehabilitations.

Explore the City

Braga is a wonderful tourist destination that combines history and culture, with numerous outstanding tourist attractions. The city is often regarded as the religious centre of Portugal, and this is confirmed every hour when a cacophony of different church bells ring-out.

Braga is home to the oldest cathedral in Portugal, and a day's sightseeing can provide a glimpse into the importance and extensive history of the city. Within the maze of narrow streets, Gothic churches back onto modern shopping streets and grand baroque buildings surround peaceful plazas.

Course topics

- **Hands-on course:** With actual patients where participants perform implant surgery with immediate loading. Full arch rehabilitation with only four implants two axial implants tilted up to 45° in the posterior and a fixed bridge for patients meeting the immediate loading criteria.
- Review the scientific basis: Complete implant supported rehabilitation and the NeoArch® concept. Allow participants to apply the surgical and restorative skills in a hands-on workshop on actual patients.
- Focus on the clinical and laboratory aspects: Biological, functional and aesthetics parameters in immediate loading of full arch implant supported rehabilitations.

Learning objectives

- Review the scientific basis for total implant rehabilitation and the NeoArch concept;
- Allow participants to apply surgical and restorative techniques through hands-on in real patients;
- To demonstrate the clinical and laboratory aspects at the biological, functional and aesthetic level of the total rehabilitations.

Explore the City

Braga is a wonderful tourist destination that combines history and culture, with numerous outstanding tourist attractions. The city is often regarded as the religious centre of Portugal, and this is confirmed every hour when a cacophony of different church bells ring-out.

Braga is home to the oldest cathedral in Portugal, and a day's sightseeing can provide a glimpse into the importance and extensive history of the city. Within the maze of narrow streets, Gothic churches back onto modern shopping streets and grand baroque buildings surround peaceful plazas.

Sinus Lift

Live Surgery

Surgery in Patient

Advanced

Complex

Participants: 6 doctors per course

Practice: 2 surgeries per participant

Duration: 5 days

Venue: Rua de Fernandes
Tomás 424, 4000-210
Gondomar, Portugal

Main Objective

Concepts of piezo surgery, its advantageous use in sinus lift surgery. Immediate or deferred implant placement.

Course topics

- Identify and diagnose the different types of bone defect;
- Indications and contraindications of sinus lift surgery.

Learning objectives

Know the main surgical techniques Caldwell-Luc Technique and Sommers Technique, detailed surgical sequences, surgical instruments and aseptic care.

Concepts of piezo surgery, its advantageous use in sinus lift surgery and recommended tips. Immediate or deferred implant placement.

Explore the City

The Município de Gondomar (Municipality of Gondomar) is situated in the Área Metropolitana do Porto (Porto Metropolitan Area), has an area of 130,7 Km² and benefits from a stretch of the rio Douro (River Douro) of approximately 37 Km. This important resource makes it a strong tourism potential for Nature Tourism and Nautical Tourism. In this context, river beaches stand out because of their unique landscapes, which attract a lot of people during the bathing season.

The Douro also influences the gastronomy of the Municipality, as its most emblematic products are the shad and the lamprey. The very rich cultural heritage and the ancient traditions of shaping filigrana (filigree) and talha (woodcarving) also stand out.

Tourism, because of its transverseness, is considered an important factor for the economic boost of the Municipality, and Gondomar is a multifaceted destination and provides its visitors with authentic and different experiences.

Advanced

Complex

Participants: 6 doctors per course

Practice: 3 surgeries per participant

Duration: 6 days

Venue: Rua de Fernandes
Tomás 424, 4000-210
Gondomar, Portugal

Main Objective

The main objective is to fully understand the latest techniques in bone grafting from theory to practice.

Course topics

- Classification of bone defects and their evaluation;
- Principles transversal to the different techniques: Soft tissue manipulation, regenerative materials to use, surgical instruments and aseptic care;
- Surgical techniques for bone grafting;
- Possible complications of the various techniques.

Learning objectives

- Anatomical concepts and biological bases for a better understanding of bone reconstruction;
- Immediate or deferred implant placement;
- Execution of the techniques in biodynamic models, step by step;
- Using the Piezoelectric.

LIAN - Lateralization of the inferior alveolar nerve

Live Surgery

Surgery in Patient

Advanced

Complex

Participants: 4 doctors per course

Practice: 1 surgery per participant

Duration: 5 days

Venue: Rua de Fernandes
Tomás 424, 4000-210
Gondomar, Portugal

Main Objective

This course is to help doctors gain the skills and the essential knowledge they need to provide to patients in LIAN.

Course topics

- Optional techniques for the rehabilitation of atrophic jaws.
- Surgical techniques: lateralization and transposition of the inferior alveolar nerve- indications and contraindications
- Concepts of piezo surgery and its indispensable use in this surgical technique.

Learning objectives

- Anatomical concepts of the mandible and its noble structures;
- Diagnosis and classification of neurological lesions, its treatment and adjuvant therapies;
- Knowledge of intra and postoperative complications inherent to the technique, its resolutions, pharmacological indications and the application of laser therapy;
- Handling of various materials used for bone regeneration and protection of the inferior alveolar nerve.

Modular Course Implantology

Live Surgery

Hands-on pig jaw

Surgery in Patient

Straightforward

Advanced

Complex

Participants: 8 doctors per course

Practice: 3 to 4 depends on the experience of the dentists

Duration: 3 days

Venue: Av. Eng. Duarte Pacheco
2581, 4440-500
Valongo, Portugal

Main Objective

This course is for dental professionals who already place dental implants but seek to learn, improve and actually perform patient surgeries with the Neodent Implant System.

Course topics

- Diagnosis and treatment plan;
- Demonstrative surgery;
- Surgical Hands-on, Prosthetic Hands-on and Sinus lift Hands-on;
- Surgeries in patients.

Learning objectives

Systematically review all surgical implant techniques from the simplest cases to more advanced ones.

Provide dental practitioners with diagnostic tools and appropriate therapeutic to approach the daily implantology of a simple and predictable form.

Communication Techniques Module:

- Communication Techniques and doctor/patient relation;
- Communication skills in oral rehabilitation in implantology.

Explore the City

Porto is the second- largest city in Portugal after Lisbon and one of the major urban areas of the Iberian Peninsula. Located along the Douro river estuary in Northern Portugal, Porto is one of the oldest European centres, and its historical core was proclaimed a World Heritage Site by UNESCO in 1996. The western part of its urban area extends to the coastline of the Atlantic Ocean.

Due to its long history, the city of Porto carries an immense architectural patrimony. From the Romanesque Cathedral to the Social Housing projects developed through the late 20th century, much could be said surrounding architecture.

Advanced surgeries bone grafts with emphasis on sinus lifts

Main Objective

To present the latest techniques in bone augmentation in implantology with predictability and scientific evidence: from theory to practice.

Course topics

- Patient pre-operative evaluation
- Treatments for the atrophic jaws
- Options for grafting- autogenous and biomaterials
- Techniques for inlay and onlay bone grafting
- GBR - lateral and vertical augmentation
- Advantages and disadvantages of the use of conventional and piezo instruments
- Wide and short implants: as an alternative to bone grafts
- **Live surgery demonstration:** lateral ridge augmentation or sinus lift
- **Hands-on:** bone inlay and onlay grafts and implant placement
- **Clinics:** depending on patient availability and approval, cases with lateral ridge augmentation may be done, being that the focus is on sinus lifts with or without immediate implant placements

Learning objectives

This is an advanced course with patient care for professionals who already have experience in surgeries, especially in implantology. Indicates for doctors that want to acquire or share knowledge and professional experiences especially in full arch rehabilitation with oral implants using the concept of immediate loading, as well as procedures of bone grafts: elevation of the maxillary sinus floor and block bone grafts (onlay).

About ILAPEO Dental School

Educate yourself in ILAPEO at the Latin American Institute of Dental Research and Education. A rare opportunity to train with the elite masters and trainers of ILAPEO. Neodent has partnered with ILAPEO (The Latin American Institute of Dental Research and Education), a renowned center of excellence in research, development and innovation in dental clinical practice. ILAPEO is an institution made up of professionals, teachers and researchers whose aim for the last 10 years has been to offer recognized and certified postgraduate, specialist and master's courses.

Factory Tour

Visit Neodent Manufacturing Plant to get the Neodent 360° overview of its operation and where over one million implants are produced every year making Neodent the 2nd largest company in the segment. Recently, Neodent intensified its expansion project, building a new logistics center of 2,400m² and increasing the factory's size from 10,00m² to 15,000m².

Explore the City

Curitiba is capital of the state of Paraná, located in the southern region of Brazil. The city is considered the greenest urban area of Latin America, with amazing parks such as the Botanical Garden, Tanguá and Barigui park. Curitiba is also a national reference in quality of life, urban innovations, culture and gastronomy. The culture life is surrounded by museums and art exhibition galleries. Besides, the nightlife is full of options, going through craft breweries into fine restaurants.

- Treatments for the atrophic jaws
- Options for grafting- autogenous and biomaterials
- Techniques for inlay and onlay bone grafting
- GBR - lateral and vertical augmentation
- Advantages and disadvantages of the use of conventional and piezo instruments
- Wide and short implants: as an alternative to bone grafts
- **Live surgery demonstration:** lateral ridge augmentation or sinus lift
- **Hands-on:** bone inlay and onlay grafts and implant placement
- **Clinics:** depending on patient availability and approval, cases with lateral ridge augmentation may be done, being that the focus is on sinus lifts with or without immediate implant placements

Learning objectives

This is an advanced course with patient care for professionals who already have experience in surgeries, especially in implantology. Indicates for doctors that want to acquire or share knowledge and professional experiences especially in full arch rehabilitation with oral implants using the concept of immediate loading, as well as procedures of bone grafts: elevation of the maxillary sinus floor and block bone grafts (onlay).

Full arches with immediate loading: an immersion on NeoArch® technique

Main Objective

To prepare the experienced surgeon on state of the art treatment for full arches.

Course topics

- Definition and principles in immediate loading
- Pre-requisites for primary stability
- The importance of pre-prosthetic prep for the success of hybrid rehabilitations
- Multi-functional guides
- Surgical planning for maxilla and mandible
- Surgical and impression techniques
- Working together with the lab technician: cast and CAD/CAM metal bars
- One step passive fitting technique
- Installation of the hybrid: recommendations and follow-ups
- **Full arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** surgical and prosthetic steps conducted on mannequin
- **Clinics:** one full-arch treatment per participant as main surgeon and another one as second surgeon.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on state of the art treatment for full arches.

Immediate Loading technique with GM implants: from surgery to prosthetic resolution

Main Objective

To prepare the professional in immediate loading for his day to day practice.

Course topics

- Definition and Principles in immediate loading
- Pre-requisites for primary stability
- Surgical Technique - single and multiple / full-arch
- Implant design & bio-engineering
- Prosthetic components and restorative possibilities for single and multiple/ cement and screw-retained
- Prosthetic prep for full arches-from impression to multi-functional guide
- Surgical planning for maxilla and mandible
- Metal bar- casted and CAD/CAM
- Installation of the hybrid- recommendations and follow-ups
- Guided Surgery- where we came from and where we are now
- Advantages and indications
- Workflow for single, multiple and full arch cases
- Outsourcing of virtual planning and guide fabrication
- Surgical Technique and Specific Surgical Kit
- **Full-arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** understanding the GM connection, the Helix hybrid implant, and all prosthetic components for analog and digital workflows.
- **Clinics:** planning and operating patients to deliver immediate single and multiple temporary restorations.

Learning objectives

Immediate loading concept with NeoArch®

Live Surgery

Hands-on Plastic Model

Advanced

21 credits**

Participants: 9 doctors per course

Fee: € 1.700 (incl. VAT)*
*Price incl. catering and dinner

Duration: 2 days

Booking info: www.neodent.de/veranstaltungen

Venue: DETEUM –Die Zahnarztpraxis
An der Brake 2
49685 Emstek

**The event corresponds to the current guidelines for continuing education of KZBV, BZÄK and DGZMK and the scoring of training courses by BZÄK and DGZMK.

Main Objective

This course will help you to gain the skills you need to provide your patients with full arch treatment options. It provides essential knowledge for full arch rehabilitation on four implants with immediate loading. Preoperative planning, surgical and prosthetic concepts are explained through lectures, a live surgery demonstration and hands-on sessions on models.

Course topics

- Morse taper principles
- Surgical and prosthetic components
- Immediate loading and considerations
- Immediate provisionalisation
- Complications for full arch cases
- View live surgery
- Final stage restoration and hygiene considerations

Program in Detail

Day 1:

- Live surgery on the toothless patient
- System Introduction GM Helix Implant (Theory)
- Hands-on demo on phantom under realistic clinical conditions
- Hands-on exercises for NeoArch® on the Phantom in teams of three under supervision
- Preparation of the therapeutic dentures for the patient the live surgery
- Integration of the therapeutic dentures at the live surgery patients
- Dinner

Learning objectives

By the end of the course the participant will be able to:

- Obtain the knowledge for a prosthetic driven planning concept
- Understand immediate loading concepts
- Restore a full arch on four implants

Day 2:

- Continued hands-on exercise in teams of three with the phantom
- Marketing: how do I get the right patients for
- The immediate supply concept, the external presentation and communication in practice
- Final discussion and certificate handover

Explore the City

Emstek is located about 45 min south-west of Bremen, which is a Medieval Germany with the first ever coffee house opened in Bremen in the 17th century, while the Bremen-based coffee merchant Ludwig Roselius was the man who invented decaf coffee at the start of the 1900s. In the 20s Roselius gave Bremen the Böttcherstraße, a whole street of "Brick Expressionist" houses and workshops, all still intact. Bremen also has quaint maritime neighborhoods, museums of all descriptions on its "Cultural Mile" and UNESCO-listed Medieval and Renaissance monuments at the central Market Square.

Advanced surgeries bone grafts with emphasis on sinus lifts

Main Objective

To present the latest techniques in bone augmentation in implantology with predictability and scientific evidence: from theory to practice.

Course topics

- Patient pre-operative evaluation
- Treatments for the atrophic jaws
- Options for grafting- autogenous and biomaterials
- Techniques for inlay and onlay bone grafting
- GBR - lateral and vertical augmentation
- Advantages and disadvantages of the use of conventional and piezo instruments
- Wide and short implants: as an alternative to bone grafts
- **Live surgery demonstration:** lateral ridge augmentation or sinus lift
- **Hands-on:** bone inlay and onlay grafts and implant placement
- **Clinics:** depending on patient availability and approval, cases with lateral ridge augmentation may be done, being that the focus is on sinus lifts with or without immediate implant placements

Learning objectives

This is an advanced course with patient care for professionals who already have experience in surgeries, especially in implantology. Indicates for doctors that want to acquire or share knowledge and professional experiences especially in full arch rehabilitation with oral implants using the concept of immediate loading, as well as procedures of bone grafts: elevation of the maxillary sinus floor and block bone grafts (onlay).

Immediate Loading technique with GM implants: from surgery to prosthetic resolution

Main Objective

To prepare the professional in immediate loading for his day to day practice.

Course topics

- Definition and Principles in immediate loading
- Pre-requisites for primary stability
- Surgical Technique - single and multiple / full-arch
- Implant design & bio-engineering
- Prosthetic components and restorative possibilities for single and multiple/ cement and screw-retained
- Prosthetic prep for full arches-from impression to multi-functional guide
- Surgical planning for maxilla and mandible
- Metal bar- casted and CAD/CAM
- Installation of the hybrid- recommendations and follow-ups
- Guided Surgery- where we came from and where we are now
- Advantages and indications
- Workflow for single, multiple and full arch cases
- Outsourcing of virtual planning and guide fabrication
- Surgical Technique and Specific Surgical Kit
- **Full-arch live surgery demonstration** with immediate loading for definite hybrid rehabilitation
- **Hands-on:** understanding the GM connection, the Helix hybrid implant, and all prosthetic components for analog and digital workflows.
- **Clinics:** planning and operating patients to deliver immediate single and multiple temporary restorations.

Learning objectives

This is a theoretical/practical course for professionals interested in knowing the Neodent Implant system and / or acquiring / sharing professional experiences especially in surgical / prosthetic procedures focusing on the concept of immediate loading and oral implants.
